

Temperature- Controlled Shaking

MADE IN
GERMANY

The average operational **lifespan of 10 years** is backed by a **3 year warranty** and makes your purchase a worthwhile investment.

An overtemperature sensor **preventively shuts off the unit in a dangerous heat-up situation** – particularly valuable in case of continuous operation

Rule out accidents: all models have been designed with a low center of gravity which prevents gliding at high speed, even on a damp surface

Choose between different shaking motions, orbits, angles and load capacities: **the right model for your specific application**

Unlimited **visual reaction control** at all times: the transparent, non-fogging PETG material offers it all

Immediate access: optional incubator hood opens instantly and interlocks in any position

For applications in microbiology: the insulated drive system **prevents** any heat build-up from the motor and consequently **thermal damage** to your sample
