VISCO JET® - 60 mm

P/N: 036300470

Particularly in the case of applications with very viscous media such as pastes and gels, a very reliable stirring process in the entire vessel without air entry is important. This is what the innovative stirring system VISCO JET[®] offers!

The particular shape of the blades triggers an intrinsically dynamic flow, which shortens the process times with significantly better mixing results compared to conventional impellers. An all-rounder for aqueous and highly viscous substances. You can find out more about this <u>here.</u>

The VISCO JET® 60 is ideal for vessels with the following characteristics:

ideal vessel diameter: 100- 150 mm
ideal ground clearance: 18 mm
ideal filling level: 100- 150 mm

• ideal volume: 800 - 2,700 ml

The VISCO JET® 60 is made of stainless steel A stirrer shaft with a diameter of 10 mm is included in the scope of delivery.

Premium Laboratory Equipment

VISCO JET® - 60 mm - Technical Data

| Blade size | 60 mm |
|----------------------|---------------------|
| Material | stainless steel V4A |
| Length | 500 mm |
| Shaft diameter | 10 mm |
| For vessel diameter | 80 - 150 mm |
| Rotation speed range | 200 - 800 rpm |
