

PR 33 Ringed Pitched-Blade Impeller (66 mm)

P/N: 509-33000-00

Due to its blade dimensions, the ringed pitched-blade impeller PR 33 is ideal for solutions, emulsions and suspensions in vessels with the following characteristics:

- ideal vessel diameter: 165- 330 mm
- ideal ground clearance: 33- 66 mm
- ideal filling level: 165- 330 mm
- ideal volume: 3,500- 28,200 ml

The ringed pitched-blade impeller PR 33 has a total length of 400 mm and is made of stainless steel. Its stirrer shaft has a diameter of 8 mm.

PR 33 Ringed Pitched-Blade Impeller (66 mm) - Technical Data

Blade size	66 mm
Material	stainless steel V4A
Length	110 mm
Shaft diameter	10 mm
Max. rotation speed	1500 rpm
