

VISCO JET® CRACK - 80 mm

P/N: 509-17080-00

Particularly in the case of applications with very viscous media such as pastes and gels, a very reliable stirring process in the entire vessel without air entry is important. This is what the innovative stirring system VISCO JET® offers!

The particular shape of the blades triggers an intrinsically dynamic flow, which shortens the process times with significantly better mixing results compared to conventional impellers. An all-rounder for aqueous and highly viscous substances. You can find out more about this [here](#).

The VISCO JET® Crack 80 is ideal for vessels with the following characteristics:

- ideal vessel diameter: 133- 200 mm
- ideal ground clearance: 24 mm
- ideal filling level: 133- 200 mm
- ideal volume: 1,900 - 6,300 ml

The VISCO JET® Crack 80 is made of stainless steel

A stirrer shaft with a diameter of 10 mm is included in the scope of delivery.

VISCO JET® CRACK - 80 mm -

| | |
|---------------------|---------------------|
| Blade size | 80 mm |
| Material | stainless steel V4A |
| Length | 500 mm |
| Shaft diameter | 10 mm |
| For vessel diameter | 115 - 200 mm |
| | 200 - 700 rpm |
